## Memorandum

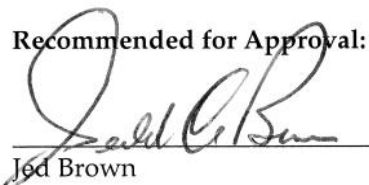

June 27, 2005

To: Jed Brown  
From: Bill Griffing   
Subject: Revised FESHM Chapter 10010

Enclosed you will find a revised Fermilab ES&H Manual Chapter 10010. This short chapter was revised and reviewed as a part of our routine program to revisit portions of the FESHM periodically. The usual opportunity for labwide review and comment was provided. This short chapter establishes Fermilab's radiation protection program and incorporates the Fermilab Radiological Control Program as being part of the FESHM. The present revision incorporates minor word changes intended to bring this chapter up-to-date and comments received during the labwide review. Don Cossairt was the principal developer of the revisions to this chapter.

After final approval, please return the signed copy to ES&H Admin at MS119 and this chapter will then be posted in the web.

## RADIATION SAFETY PROGRAM

### INTRODUCTION

This chapter establishes the Fermilab Radiation Safety Program. The program is fully detailed and implemented in the Fermilab Radiological Control Manual (known as the Fermilab Radiation Guide prior to 1993). The Fermilab Radiological Control Manual is therefore considered part of this ES&H Manual and is available on the ES&H Section web page at [http://www-esh.fnal.gov/pls/default/esh\\_home\\_page.page?this\\_page=900](http://www-esh.fnal.gov/pls/default/esh_home_page.page?this_page=900).
